

Sewer Issues

Sewer Back-up

If you have a sewer back-up in your home or place of business:

1) Call a plumber.

The plumber will determine the location of the system failure.

- Homeowner responsibility to repair if the failure is located from the edge-of-way toward your home (or in your home).

- If failure is from the cleanout to the right of way notify Adams County Control at 624-2101; they will contact Conewago Township.

2) Contact your home-owner's insurance for additional guidance.

Sewer Discharge

If you witness sewer flowing from a manhole or flowing onto the ground or street:

1) Notify Adams County Control at 624-2101 or dial 911; they will contact Conewago Township.
